

Sample Data

Input Files, Database Schema & Expected Agent Outputs

Team: ToolForge | Project: Console Agent in C# | June 2026

SAMPLE
DATA

■ SQLite Database Schema

The local SQLite database (**toolforge.db**) is auto-created and seeded on first run by **SchemaSetup.cs** and **SeedData.cs**. It contains two tables:

employees table

```
CREATE TABLE employees ( id INTEGER PRIMARY KEY AUTOINCREMENT, name TEXT NOT NULL, dept TEXT NOT NULL, role TEXT NOT NULL, sales REAL DEFAULT 0, joined TEXT NOT NULL );
```

products table

```
CREATE TABLE products ( id INTEGER PRIMARY KEY AUTOINCREMENT, name TEXT NOT NULL, category TEXT NOT NULL, price REAL NOT NULL, stock INTEGER NOT NULL );
```

■ Seed Data — employees Table

ID	Name	Department	Role	Sales (INR)	Joined
1	Priya Sharma	Sales	Senior Rep	1,42,000	2022-03-15
2	Arjun Nair	Sales	Rep	1,38,500	2023-01-10
3	Meera Iyer	Sales	Rep	1,25,000	2022-09-01
4	Vikram Rao	Engineering	Engineer	—	2021-06-20
5	Lakshmi Kumar	HR	Manager	—	2020-11-05
6	Ravi Chandran	Sales	Junior Rep	98,000	2024-02-14
7	Divya Menon	Marketing	Analyst	—	2023-07-30

■ Seed Data — products Table

ID	Product Name	Category	Price (INR)	Stock
1	Laptop Pro 15	Electronics	85,000	42

ID	Product Name	Category	Price (INR)	Stock
2	Wireless Mouse	Electronics	1,200	150
3	Office Chair	Furniture	18,000	28
4	Standing Desk	Furniture	32,000	12
5	USB-C Hub	Electronics	3,500	87
6	Noise Cancelling Headphones	Electronics	12,000	55
7	Mechanical Keyboard	Electronics	7,500	34

■ Sample Queries — Input / Tool Call / Expected Output

Query 1

User Input:

What is the weather in Chennai right now?

Tool Call Invoked:

```
get_weather({ "city": "Chennai" })
```

Raw Tool Output:

```
City: Chennai | Temp: 34.2°C | Humidity: 72% | Condition: partly cloudy
```

Final Agent Response:

The current weather in Chennai is 34.2°C with 72% humidity. Conditions are partly cloudy — a typical summer day.

WEATHER

TOOL

Query 2

User Input:

What time is it in Tokyo right now?

Tool Call Invoked:

```
get_time({ "timezone": "Asia/Tokyo" })
```

Raw Tool Output:

```
2026-06-09 17:45:03 JST
```

Final Agent Response:

It is currently 5:45 PM in Tokyo (Japan Standard Time).

TIME TOOL

Query 3

SQLITE TOOL

User Input:

Who are the top 3 employees by sales this quarter?

Tool Call Invoked:

```
query_sqlite({ "query": "SELECT name, sales FROM employees ORDER BY sales DESC LIMIT 3" })
```

Raw Tool Output:

```
[{"name": "Priya Sharma", "sales": 142000}, {"name": "Arjun Nair", "sales": 138500}, {"name": "Meera Iyer", "sales": 125000}]
```

Final Agent Response:

The top 3 employees by sales are:

1. Priya Sharma — INR 1,42,000
2. Arjun Nair — INR 1,38,500
3. Meera Iyer — INR 1,25,000

Query 4

SQLITE TOOL

User Input:

List all electronics products under 5000 rupees

Tool Call Invoked:

```
query_sqlite({ "query": "SELECT name, price, stock FROM products WHERE category = 'Electronics' AND price < 5000" })
```

Raw Tool Output:

```
[{"name": "Wireless Mouse", "price": 1200, "stock": 150}, {"name": "USB-C Hub", "price": 3500, "stock": 87}]
```

Final Agent Response:

There are 2 electronics products under INR 5,000:

- Wireless Mouse at INR 1,200 (150 in stock)
- USB-C Hub at INR 3,500 (87 in stock)

Query 5 (Multi-Tool Chain)

MULTI TOOL

User Input:

What's the weather in London and what time is it there?

Tool Call Invoked:

```
Step 1: get_weather({ "city": "London" }) Step 2: get_time({ "timezone": "Europe/London" })
```

Raw Tool Output:

```
Step 1: City: London | Temp: 17.3C | Humidity: 65% | Condition: light rain Step 2: 2026-06-09 14:15:22 BST
```

Final Agent Response:

In London it's 17.3C with light rain and 65% humidity. The current local time is 2:15 PM BST (British Summer Time).

■ SQL Safety — Blocked Query Examples

The following queries are submitted to `query_sqlite()` and must be blocked. These are included in the sample data as adversarial test inputs.

Malicious Input	Expected Result	Block Reason
DROP TABLE employees	Blocked: forbidden keyword DROP	Destructive DDL
DELETE FROM employees	Only SELECT statements are permitted	Destructive DML
INSERT INTO employees VALUES ...	Only SELECT statements are permitted	Write operation
UPDATE employees SET sales=0	Only SELECT statements are permitted	Write operation
SELECT 1; DROP TABLE employees;--	Blocked: forbidden keyword DROP	Injection attempt
ATTACH DATABASE '/etc/passwd'	Only SELECT statements are permitted	Path traversal
